KE Arms is a manufacturer specializing in products for the firearms industry. These product areas include complete firearms and components for AR15 and AR10 rifles, pistol caliber carbines, shotguns, and pistols. Our emphasis in manufacturing is robust quality and a dedication to the advancement of firearms technology and usability. Our team combines 30+ years of tier-one manufacturing experience in the automotive, aerospace and semi-conductor industries. Our competition shooting team actively participates in our cycle of research and development. This unique combination allows us to produce firearms and accessories with the most advanced tools and techniques in the industry that are specifically designed for real-world applications. Our products are all made in America by Americans
